You're almost ready to go! Now you just need to simply run the notebooks! All the examples run on Databricks Runtime 3.1 and above so just be sure to create a cluster with a version equal to or greater than that. With an emphasis on improvements and new features in Spark 2.0, authors Bill Chambers and Matei Zaharia break down Spark topics into distinct sections, each with unique goals. You'll explore the basic operations and common functions of Spark's structured APIs, as well as Structured Streaming, a new high-level API for building end-to-end streaming applications. Unsupervised Learning 30. Alternatively, you could just clone the entire repository to your local desktop and navigate to the file on your computer. Reload to refresh your session. Source Code - Matei Zaharia (2 books) Bill Chambers Page 2 How to run the code To run the example on your local machine, either pull all data in the data subfolder to /data on your computer or specify the path to that particular dataset on your local machine.
